

General information

The compact KCX+ unit is equipped with a control together with other components, such as water or heat recovery rate) and adjust the operation of fans mobile devices.

and monitoring automation system with an intuitive electric heater, water cooler or DX cooler. On-board menu implemented on a touch panel. This applica- controls allow control of other external components tion allows to preview all necessary operating pa- installed in the building. Ethernet module (optional) rameters (temperature, quality of filters, fan speeds, allows for full remote control of the recuperator via

KCX+Control System

The unit is made for providing fresh air and remove contaminated. Heat recovery is implemented on a counter-flow plate heat exchanger and is based on heat transfer between exhaust and supply air streams.

KCX^e units are designed to work in both: vertical and horizontal positions. Circulation duct outlets ø 125 - ø 250 placed on top of the unit, are dedicated for connection of heat recovery unit with the whole ventilation system.

The unit is ready to cooperate with external air treatment functions: chilled water coil, hot water coil, ground coupled heat exchanger.

Advantages of KCX+ Control System

4,3" touch panel with intuitive menu

Monitoring and control of comfort and operating parameters – temperature/ humidity*/CO₂ level*/efficiency/energy recovery

Quick selection of the unit's operating modes: ON-OFF/STAND-BY/COMFORT/ CALENDAR

Automatic by-pass of counterflow heat exchanger (DEFROSTING/SUMMER

Stepless control of electric heater

Cooperation with additional heat exchangers: water heater/water cooler or DX cooler/ground heat exchanger

Filter quality level monitoring

Remote monitoring and control via mobile devices - ETHERNET module**

Management of unit operation using the CLOUD technology, including data storage, trends and alarms

Technical data

MODEL		KCX 300	KCX 500	KCX 800
Nominal airflow [m³/h]		300	500	800
Unit dimensions H / B / C [mm]		705 / 731 / 460	850 / 900 / 560	949 / 1061 / 660
Unit weight [kg]		37	50	68
Duct outlets [mm]		3 × Ø 125 1 × Ø 160	3 x Ø 160 1 x Ø 200	3 x Ø 200 1 x Ø 250
Heat exchanger		CPR	CPR	CPR
Exchanger efficiency [%]		up to 92	up to 91	up to 91
Supply and exhaust fan	Input power [W]	2 x 67	2 x 174	2 x 178
	Input current [A]	2 x 0.5	2 x 1.1	2 x 1.1
Sound power level	In room at airflow	51 dB(A)	50 dB(A)	52 dB(A)
	In duct at airflow	60dB / 57dB(A)	66dB / 60dB(A)	60dB / 57dB(A)
Supply air filter (*options)		G4 (*F7)	G4 (*F7)	G4 (*F7)
Exhaust air filter		G4	G4	G4
Air inlet electrical heating coil [W]		1200	2400	3600

^{*} Measuring instrument out of delivery scope ** Optional component

EFFECTIVE

Guarantee of maintaining high indoor air quality – temperature, cleanliness, energy recovery

Automatic by-pass of the energy recovery exchanger

Eliminating the "Sick Building Syndrome" (SBS)

Parameters conforming to the requirements of the passive house

ECONOMIC

High degree of heat energy recovery – cross-flow counterflow heat exchanger with efficiency up to 92%.

Low consumption of electric power – EC fan units

ELASTIC

Selection of vertical or horizontal mounting positions as appropriate

ERGONOMIC

PLUG&PLAY unit – just install, connect and turn on

Intuitive unit management system – touch-operated controls

GET IN TOUCH WITH US

Klimor's representatives look forward to providing you with an excellent product and superior customer service.
